Functional explanation

computer USB device for access control, a complete record of external USB storage device state changes. Regardless of drive, external hard drives, USB card reader, microphone, wireless network card, and other devices can record and notify the manager immediately.

Examples

Plug and Play with the time to write with the USB device, you change the habit of access to the files. All information in the blink of an eye will be able to carry into the USB devices, while also easily glue used Fangbu Zhu also the security hole. For this serious problem, JFETEK JAPAN special MISKeeper developed the "USB device management" function. To allow access to all external USB devices can effectively manage and record the course of action, network management personnel to provide the best

protective measures.
